

Netskope Security Cloud Platform

Data-centric. Cloud-smart. Fast.

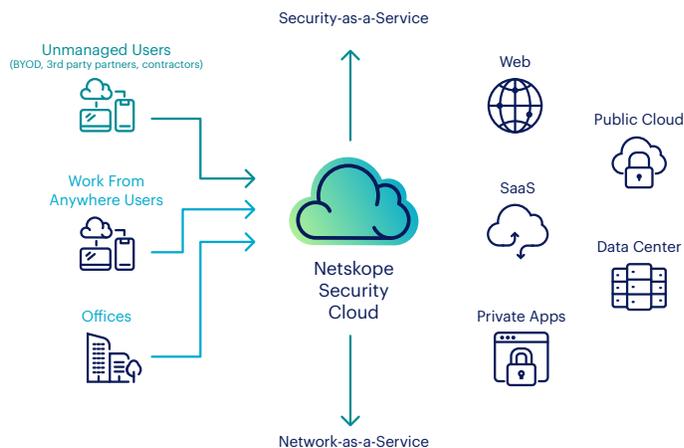

Supporting users connecting from anywhere is driving cloud transformation. It's changing how work gets done as everything is becoming more intuitive, connected, open, and collaborative, and that change is reflected across SaaS, IaaS, and web environments, creating new challenges and risks.

Why is Netskope the best choice?

Netskope Security Cloud addresses these new challenges and risks, providing a platform for the convergence of security solutions, the Security Service Edge (SSE), by protecting data and users, wherever they are. Netskope provides unrivaled visibility and real-time data and threat protection when across cloud, web, and private apps. Netskope delivers cloud and data-centric security.

Safely enable users anywhere

- **Eliminate blind spots:** With Patented Netskope Cloud XD™, Netskope goes deeper and understands more to quickly target and control activities across thousands of cloud (SaaS and IaaS) services and millions of websites.
- **Secure managed and unmanaged cloud services:** Secure managed cloud services like Microsoft 365, G Suite and AWS, while safely enabling unmanaged, business-led cloud services without the need for blocking.
- **Guard sensitive data with award-winning DLP:** Netskope DLP and introspection enables the protection of sensitive content that matches DLP profiles. Includes pre-defined DLP profiles for regulatory compliance.
- **Stop elusive cloud threats and malware:** Protect against malware, advanced threats, and cloud-enabled threats with anti-malware, sandboxing, ML analysis, the Cloud Threat Exchange (CTE) for IOC sharing, plus add-on Behavior Analytics or Targeted RBI.

Key Benefits and Capabilities

Govern cloud and web use for users anywhere

Secure managed and unmanaged users with unified policies for SaaS, IaaS and web security.

Flexible deployment options for any use case

Netskope deployment options support any use case, from an API-only deployment mode to several real-time options, with the ability to deploy 100% in the cloud or in a hybrid deployment.

Simplify Operations

By integrating key SSE components including SWG, CASB, ZTNA, FWaaS, RBI, DLP, threat protection, SSPM and CSPM in the Netskope Security Cloud, organizations get the benefit of a single pass architecture with a single management console.

Adaptive Zero Trust Policy

Embrace zero trust principles, while ensuring flexibility of adaptive policy controls that understand context changes to update access controls for each unique situation.

Fast User Experience

Netskope understands the cloud and delivers data-centric security from one of the world's largest and fastest security networks with the best SLAs in the industry.

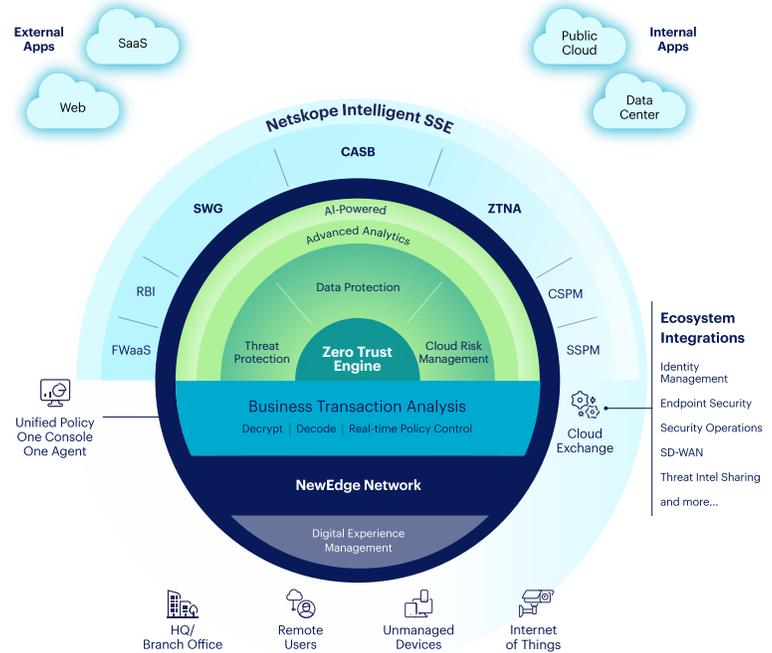

“Customers experienced high value with Netskope...with the protection and speed they needed to enable business velocity and secure their digital transformation journey.”

– ESG Whitepaper *Analyzing the Economic Benefits of the Netskope Cloud Security Platform* by Nathan McAfee and Jack Poller, October 2021

The Netskope Difference

Fast everywhere, data-centric, and cloud-smart.

Using patented technology called Netskope Cloud XD™, the Netskope Security Cloud eliminates blind spots by going deeper than any other security provider to quickly target and control activities across thousands of cloud (SaaS and IaaS) services and millions of websites. With full control from one cloud, our customers benefit from 360-degree data protection that guards data everywhere and advanced threat protection, including targeted RBI for risky websites that stops elusive attacks.

YOUR NEEDS	THE NETSKOPE SOLUTION
SaaS, IaaS, Web Discovery and Risk Assessment	Netskope Cloud Confidence Index (CCI) rates the risk level and enterprise-readiness of SaaS and IaaS services based on 60+ criteria like security, auditability, and business continuity. Serves as a guidepost to mitigate risk, influence usage and reduce costs.
Granular Visibility and Control of SaaS, IaaS and Web	Netskope Cloud XD understands all inputs in extreme definition (XD) and performs big data analytics to eliminate blind spots and make policy enforcement simple across all SaaS, IaaS, and web.
Award-winning DLP	Prevent data leakage from SaaS, IaaS, and web with accuracy and precision supported by AI/ML enhanced DLP technology, reducing false positives, supported by 40 predefined compliance templates.
Threat Protection	Threat intelligence for malicious sites, with dynamically updated threat intelligence feeds, UEBA for anomaly detection and insider threats, and cloud malware protection and remediation.
NewEdge Network	Embracing a secure access service edge (SASE) architecture, NewEdge is the world's largest, highest-performing security private cloud and powers the real-time, inline security services of the Netskope Security Cloud allowing security to be deployed at the edge where and when it's needed.

Netskope, a global cybersecurity leader, is redefining cloud, data, and network security to help organizations apply Zero Trust principles to protect data. The Netskope Intelligent Security Service Edge (SSE) platform is fast, easy to use, and secures people, devices, and data anywhere they go.
